## Provisional Programme

## ISOE International Symposium

*Helsinki, 16-17 June 2026*

The European Technical Centre of the Information System on Occupational Exposure (ISOE) is pleased to organize, in collaboration with and the support of Fortum, Teollisuuden Voima Oyj (TVO) and the Radiation and Nuclear Safety Authority (SUK), the 2026 ISOE International Symposium on Occupational Exposure Management at Nuclear Facilities.

The Symposium will be held in Helsinki, Finland, from the 16<sup>th</sup> to the 17<sup>th</sup> of June 2026. It is co-sponsored by the OECD Nuclear Energy Agency (NEA) and the International Atomic Energy Agency (IAEA).

The Symposium is targeted at all those concerned with radiological protection at nuclear power plants: radiation protection managers and staff members, maintenance and operation planners, contractors, exposed workers, regulatory body representatives and international organisations. It is also opened to research reactors and professionals from other nuclear fuel cycle installations sharing common radiological protection issues.

Dealing with occupational radiation protection at the design, operation and decommissioning stages of installations, as well as accident situations, this new meeting point of radiation protection professionals under the heading of ISOE will be a great opportunity to share, at the international level, experiences and practices favouring a continuous improvement of radiation protection.

Furthermore, the accompanying Technical Exhibition will give participants the opportunity to see the latest developments from industrial and commercial companies active in fields of radiation protection.

Prior to the Symposium, on Monday 14 June 2026, two meetings devoted to specific audiences have been organised:

- A Radiation Protection Managers meeting
- A Regulatory Body Representatives meeting

We are looking forward to welcoming you in Helsinki,

Caroline SCHIEBER  
*Head of ISOE-ETC*  
*On behalf of the Programme Committee*
